

# NEPEAN PRIVATE HOSPITAL CATHETER LABORATORY

1-9 Barber Ave, Kingswood, NSW 2747

VALUE: \$2.7M DURATION: May '15 – Nov '15 CLIENT: Healthscope

## PROJECT OVERVIEW:

Fugen completed the construction of a new purpose-built Catheter Laboratory to the external facade of the current facility. In addition to the new theatre, Fugen Constructions also constructed a new anesthetic scrub and exit bay, Doctor's lounge, control and store rooms as well as the external civil works including new drainage and roadway upgrade.

## CHALLENGES:

Works were undertaken on a suspended structural steel frame and concrete slab. All civil works were completed around the hospital's main entrance. Staging was arranged to ensure it didn't affect patients.

## SOLUTION:

Detailed planning, staging and coordination with the Hospital was paramount to ensure the daily functions and procedures of the Hospital continued with minimal disruptions. This included areas in various parts of the Hospital, both clinical and non-clinical, to be separated by various types of hoardings and screens, whilst maintaining a safe environment for both staff and patients.

## OVERALL OUTCOME:

Fugen's previous Healthcare Experience and familiarity of working in partially and fully functioning hospitals translated into a project that was on time, on budget and successfully met all client objectives.
